SUBJECT: MOTORS FOR OUR CONTACT TOASTERS

Please remember that all McDonald's Rapid Toasters, Models VCT-200 and VCT-250 should be using the **3 RPM Motor Kit, part number 7000364**. This kit consists of a motor, the sprocket, the mounting plate, associated hardware, a plastic bag, and finally the shipping carton. The motor itself has a number of 4000180 directly on it.

The **9 RPM Motor Kit (P/N 7000240)** is still used in the **VCT-2000 and VCT-20** toasters for **many other customers**. This is a kit consisting of all of the above except there is no sprocket or mounting plate, and the 9 RPM motor itself has a number on it of 4000167. Please make a note of this in your computers.

As always, thank you for your usual fine cooperation. If there are any questions about this or any other matter regarding our products or policies, please call the Tech Service Department at our toll free number, (877) 392-7854.
